In-kind Resource Management

- Subaward management described in “M&O Financial ...”
- In-kind
 - 2x per year, MoU SoW updates solicited
 - ICC chair, Software Coordinator, Computing Coordinator work with institutional PIs to match labor with collaboration needs:
 - Basic requirement for detector monitoring shifts
 - Software – simulation / reconstruction algorithms, general analysis tools, strike team
 - Calibration
 - Occasionally detector maintenance
 - And distributed computing resources (B. Riedel talk)
 - Reported at collaboration meetings

	UW	Non-UW
CPU	63%	37%
GPU	57%	43%

Bridge Between Collaboration and M&O

- ICC manages scientific needs of collaboration:
 - High priority tasks assigned to in-kind labor from MoUs,
 - Software strike team
 - Coordination of passX
 - New re-org of WG technical leads to serve as PoC on ICC
- Coordinates in-kind resource pledges:
 - Labor → high priority tasks or software strike team
 - Distributed computing resources
- Maps needs to resources.

Composition and Execution

- Membership – evolution of L2 Board in MREFC
 - ICC Chair – P. Desiati
 - M&O Resource Coordinator – C. Vakhnina
 - Each Level 2 coordinator
 - TFT Chair – A. Hallgren
 - ROC Chair – E. Blaufuss
 - Analysis Coordinator – D. Williams
 - Science Working Group Technical Leads
- Monthly teleconference Wed 9.00 am
- Bi-weekly teleconference Tue 10.30 am open for general technical discussion leading up to ICC.

Summary

- IceCube M&O Program receives significant contributions of in-kind labor from the IceCube Collaboration, heavily in WBS 2.5 Software and 2.6 Calibration
- Also, significant in-kind contributions of Distributed Computing
- The Collaboration updates the Scope of Work and M&O Responsibilities in the MoU's twice a year.
- All resources are coordinated by IceCube Coordination Committee (ICC)
