

# UW-Madison Astrophysics Internship Opportunity

Applications due September 22, 2014

## UW-Madison physics research center looking for high school interns

One of the coolest telescopes in the world—literally, it's at the South Pole in Antarctica—is run by UW-Madison physicists. The Wisconsin IceCube Particle Astrophysics Center, WIPAC, is looking for high school student interns for hands-on astrophysics research.

### As a WIPAC intern, you will:

- Participate in a real world physics experiment,
- learn how to write computer programs,
- get to know working astrophysicists, and
- contribute to data processing.

**When:** October 2 to December 11, Thursdays from 4:30-6:30 pm.

**Where:** At the WIPAC offices, 222 W. Washington Ave. Madison, WI

**How:** Visit [wipac.wisc.edu/news/view/254](http://wipac.wisc.edu/news/view/254) to apply. Applications due September 22.

**APPLY** at [wipac.wisc.edu/news/view/254](http://wipac.wisc.edu/news/view/254)

[www.wipac.wisc.edu](http://www.wipac.wisc.edu)

For more information, email [hs-intern@wipac.wisc.edu](mailto:hs-intern@wipac.wisc.edu).  
Background in physics or programming not required.
