

# THE SOUTH POLE EXPERIMENT CONTEST

joining science exploration in antarctica

Are you ready for a  
SOUTH POLE CHALLENGE?

**We are looking for teams of  
creative middle school students to  
become Antarctic scientists!**

Come up with an experiment that will work in your hometown but, if repeated at the South Pole, would give a different result. Send us your proposal, and if selected, the IceCube team will repeat the experiment at the South Pole and test how things work there.

**Submit your proposal by November 10, 2017**
