

ICECUBE MASTERCLASS

AN AUTHENTIC ASTROPHYSICS RESEARCH EXPERIENCE

icecube.wisc.edu/masterclass

Join UW–Madison scientists in a collaborative analysis of real IceCube data and share your experience with student peers across the US or abroad.

Learn about IceCube, a cubic-kilometer detector buried in Antarctica's ice, and about how tiny ghostly particles, called neutrinos, can help us decipher some of the secrets of our Universe.

Audiences: High school students and teachers in grades 11 and 12. Sign up now! Registration is free but places are limited.

Wed, March 18, 2015
9:00 a.m. - 5:00 p.m.

Lectures, hands-on activities, data analysis and virtual meetings with South Pole IceCube collaborators and other students
